

Instructions to use SimuGAN

Environment

PYTHONPATH="{PYTHONPATH}:/path/to/SimuGAN"

pip install -r requirements.txt

Organize data

```
SimuGAN
├── data_cache
│   ├── clean
│   │   ├── train
│   │   └── test
│   ├── noisy
│   │   ├── train
│   │   └── test
```

Train

```
python train.py --split train --dataroot data_cache --name SimuGANv1 --CUT_mode CUT --
display_id 0 --state Train --no_html
```

Test

```
python test.py --split test --dataroot data_cache --name SimuGANv1 --CUT_mode CUT --phase
train --state Test
```
